

Natural and organic cleaning products

Be **part of the solution** and **planet eco-friendly**,
stop using chemical cleaning products
Make your own **100% biodegradable!**

Very easy recipes. 100% Biodegradable, eco-friendly.

Bicarbonate of soda (1 Kg/ 2.5 Kg/ 10 Kg bags).
Clean, deodorise, soften and more.

To clean: 2 Table Spoons in your dishwasher.

To soften: 4 TS at the end of the cycle, in your washing machine.

To make a cake: 1 TS (make sure to use a food grade bicarbonate) and don't forget flour, sugar, eggs and chocolate.

Percarbonate of soda (made from chalk, water and salt).

Disinfectant and stain remover. Replaces all Oxy products.

To remove stains: 1 to 4 Table Spoon in your washing machine.

General cleaner and disinfectant formula: 4 TS in 1 Litre of hot of water (60°). Wait 1 minute, close the bottle, it's ready. Clean oven, bin, toilet. etc ...

Citric acid (Food grade).

Great cleaner for kettle, oven, washing machine, etc...

Dishwasher tablet formula: 1 Table Spoon of Citric acid and 1 TS percarbonate.

You can add ½ glass of vinegar at the end for shining glasses.

You can even make your own lemonade:

2 TS, and once again don't forget sugar, lemon, water and 4 TS Bicarbonate of soda.

New in UK

Organic white alcohol vinegar (Food Grade). (1 litre/15 litres)

Formula: 1/3 vinegar, 2/3 water plus few drops of essential oils, it's ready.
Clean your windows, oven, toilet, floor, bath and more.

More formulas:

To clean your oven: Spread the burnt grease with Bicarbonate of soda and then with the Percarbonate formula. Wait 2 hours and rub. It will dissolve all the greases and be eco-friendly.
