

Natural and organic cleaning products

Percarbonate of soda (also known as solid hydrogen peroxide).

Disinfectant and stain remover. Replaces all Oxy products.

The ingredients are derived from raw materials (salt, water and chalk).

Typical eco-friendly product (**no chloride** and **no phosphates**).

Excellent bleaching agent (oxygen bleach), stain remover (tea, coffee, red wine, fruit stains, blood, etc).

Softens water, tremendously increases efficiency of cleaning products.

General cleaner and disinfectant formula, (Percamagic):

4 table spoons (TS) in of percarbonate of soda in 1 Litre of hot of water (60°C) (usually your tap water is at 60 degrees C). Wait 1 minute to let the gas evacuate, close the bottle, it's ready. Brilliant to clean oven, bin and toilet...

As it will stay good for 4 hours, make the quantity you need at the time. At home we make ½ litre and clean everything once.

To remove stains:

1 to 4 TS in your washing machine.

For very bad stains:

4 TS in water and soak the clothes for few hours, then wash as usual.

To clean your terrace and exterior wood:

To clean lichens, moss, grease stains and dirt.

Wood: Use Percamagic, brush. 10 to 15 minutes later brush again and rinse well.

Stone: Apply percamagic and rinse well particularly on limestone, marble slabs, etc.

To unblock and clean a sink drain:

Put 2 or 3 TS in the hole of your sink, add boiling water on top. Wait few minutes and rinse.

Find all formulas in the booklet "DIY, Make your own cleaning products".
