

Natural and organic cleaning products

Washing machine

1. Washing machine soap flakes formula:

You could directly use the flakes in your washing machine, but in order to prevent some soap flakes to stick to your clothes and alter the colour, it is best to dissolve the soap flakes, first.

Dissolve 2 Table Spoons of soap flakes in a glass of hot water.

If the water is hard (limestone water) add 1 TS of Bicarbonate of soda or 1 glass of white vinegar at each washing.

Use one glass of the preparation for a 5 Kg washing machine.

White clothes:

- 1 or 2 Table Spoons of percarbonate of soda
- 1 Glass of soap preparation

In case of heavily stains, soak the clothes in 2 Table Spoons of percarbonate of soda and water for few hours, then, wash it as usual.

Colour clothes:

- 2 or 3 Table Spoons of bicarbonate of soda
- 1 Glass of soap preparation

You can make the formula in advance to be ready for use when you need it.

Boil 1 litre of water, remove from the heat and add 40 to 45 g (this is a maximum) of soap flakes.

You can add some essential oil: Lavender, orange,...

Put the preparation in a big bottle (2 litres) and shake vigorously.

2. Washing machine black soap formula:

1/3 glass of black soap

2/3 glass of hot/warm water

If the water is hard (limestone water) add 1 Table Spoon of Bicarbonate of soda.

Use one glass of the preparation for a 5 Kg washing machine.

Stain remover:

1 to 4 Table Spoons of percarbonate of soda will replace all oxy products

For heavy stain

4 Table spoons in water and soak the clothes for few hours, then wash it as usual.

For stubborn stain on collar and wrist: apply a few drops on the stained part, leave it 30 minutes prior then wash it in the washing machine.

Hand-washing

Ideal for hand-washing of delicate clothes such as wool, silk, underwear and baby clothes: 2 Table Spoons in hot water, dissolve it, let it cool down to a mild temperature.

Find all formulas in the booklet "DIY, Make your own cleaning products".
